Abstract

A patient table including a generally C-shaped lower base having opposing laterally extending end portions connected by a longitudinally extending central portion, and wherein the longitudinally extending portion is offset laterally from a longitudinally extending center line of the table. The table also includes an upper base, front and rear lift arms extending upwardly from the lower base and holding the upper base vertically above the lower base, and an elongated patient support pallet secured on one longitudinally extending side to the upper base and having an opposite longitudinally extending side substantially overhanging the laterally extending end portions of the lower base, and wherein the pallet is made of radiolucent material.
